WINTERIZED POWER STROKER with CETANE

WINTERIZED POWER STROKER WITH CETANE is a highly concentrated, complex, multi-functional diesel fuel supplement formulated to improve low temperature filterability, provide engine detergency with new age additive technology, raise fuel cetane number, improve fuel lubricity, and control moisture. It is fully compatible with ULSD fuels and bio-diesel blends as well.

WINTERIZED POWER STROKER WITH CETANE also contains a new age detergent that cleans injectors and restores lost power due to deposits. Also, **WINTERIZED POWER STROKER WITH CETANE** is proven in L10 nozzle coking, XUD9 nozzle flow, DW10B power improvement, and DW10C IDID engine testing. (DW10C 10/10 rating). **WINTERIZED POWER STROKER WITH CETANE** contains fuel stabilizer, and rust and corrosion inhibitors.

WINTERIZED POWER STROKER WITH CETANE will provide the user with improved fuel economy and reduced exhaust emissions. **WINTERIZED POWER STROKER WITH CETANE** contains an improved Fuel Stabilizer/Anti-Oxidant Additive, which vastly improves long-term storage life of Ultra Low Sulfur Diesel Fuel and minimizes the formation of sludge resins, varnishes, lacquers, carbon deposits and the darkening of diesel fuels and filters. **WINTERIZED POWER STROKER WITH CETANE** also contains **Lyvan** for better lubricity and reduction in wear on fuel system components in **Ultra Low Sulfur Diesel Fuels**.

Formulated for Ultra Low Sulfur Diesel Fuels & Bio-Diesel Fuels

USER BENEFITS

- Anti-gel agent lowers filterability of the fuel 12 - 24°F below cloud point of the fuel
- Proprietary blend of Cold Flow Improvers and Heavy Wax Modifiers engineered to maximize cold weather operability.
- Outstanding injector cleanliness, improved emissions, power restoration, and fuel economy improvement proven in L10, XUD9, DW10B and DW10C engine testing
- Contains LYVAN, ET's proprietary synthetic lubricity additive, which replaces lubricity lost due to the removal of sulfur in the production of **Ultra Low Sulfur Diesel Fuels**
- Heavy-duty dispersion of insoluble gums
- Vastly improves fuel stability for longer storage and increases fuel thermal stability
- Outstanding XUD-9 performance and power loss restoration in DW10 testing
- Noticeable drivability improvement, reduced combustion noise, and increased engine component life
- Added power with ET's proven cetane improver technology
- Nozzles are cleaned allowing improved injector flow and prevention of Internal Diesel Injector Deposits (IDID)
- Contains Anti-Icer and Moisture Control to eliminate winter water related problems

TREATMENT RATIO

1-2000	For world class engine cleanliness (DW10C 10/10)
	Increases Cetane for up to 2 Cetane Number Improvement

Meets NCWM definition of PREMIUM DIESEL at above ratio

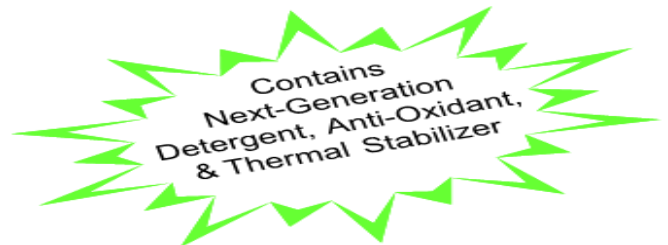

CONTAINER SIZES

⇒275 Gallon Totes

⇒55 Gallon Drums

⇒2 - 2.5 Gallon Jugs

MEETS AND EXCEEDS JOHN DEERE & STANADYNE REQUIREMENTS FOR ADDED LUBRICITY IN ULTRA LOW SULFUR FUEL

THIS PRODUCT DOES NOT CONTAIN ALCOHOL
